

Apem Launches High-Quality Hyper-Bright Halo LEDs

New QH Series Latest in Expansion of Q Series LED Indicator Range

APEM is pleased to release the latest in its LED indicator series W current LEDs. The new QH series illuminated halo indicators are APEM's latest innovation in the expanding range of LED Indicators. Designed to energize and impress your customers with a stylish visual effect, the QH halo uses optimal, high-quality hyper bright LEDs and are available in a number of different frames & color options.

The QH series is a range of LED illuminated panel mount halos available in Ø16, Ø19 and Ø22mm panel cut-outs. The QH series is easily mounted and can be used with a **16mm, 19mm or 22mm cut out switch**, including an oversized version for APEM Emergency Stop switches. The QH series halo indicators were developed for either interior or exterior applications, with **zero behind-the-panel depth**, a wide selection of bezel and lens color options and panel sealing up to IP67.

Features:

DATASHEET & PART NUMBERING
