

Apem Launches Latest in Series of Anti-Vandal Switches

New AV 30mm Pushbutton – Larger Diameter, Just As Visible, Even More Robust

APEM expands its range of security switches with a series of larger diameter 30mm pushbuttons. The AV30 mm NC/NO pushbuttons are easy to operate due to a large actuation surface and the wider illuminated ring makes them highly visible on the panel. Every detail of the AV series features appealing aesthetics and is designed to improve visibility and accessibility. The latest 30mm diameter is another valuable solution to the consumer goods and access control markets.

Distinctive Features

The AV series 30mm pushbuttons are easy to operate due to their large actuation surface. The **wider illuminated ring** provides consistent backlighting, making them highly visible on the panel.

- Bushing diameter 30 mm
- Momentary NC/NO
- Robustness: IK06
- Panel sealing: IP67
- Illuminated ring, 7 different colors
- Mechanical life: 1 million cycles
