...making excellence a habit.™

## **Diverse Electronics is ISO 9001:2015 Certified**

**Diverse Electronics** is proud to be **ISO 9001:2015** certified. The company received its certificate from the British Standards Institute (BSI) confirming its registration under ISO Standard 9001: 2015.

“Businesses must adapt to meet the growing needs of customers,” said Rick Masciotra, President of Diverse Electronics. “Diverse Electronics’ decision to become ISO 9001:2015 certified is a proactive one that not only anticipates the demands of our customers, but also demonstrates our commitment to providing quality products and services.”

To become ISO 9001:2015 certified, the company underwent an evaluation process that included quality management system development, a management system documentation review, pre-audit, initial assessment, and clearance of non-conformances, all of which work to identify corrective actions that eliminate non-conformance to the quality management standard.

### **About ISO 9001:2015**

ISO 9001 is the world’s most popular standard for quality management. ISO 9001:2015 is the first major revision of the standard since 2000, and it has been written with today’s business challenges in mind, and for organizations of any size in many different industries. The changes to the standard make it flexible enough to offer multiple benefits to organizations not only as a quality management tool, but a significant framework for business improvement, delivering efficiencies and improving customer satisfaction.

### **About Diverse Electronics**

Founded in 1993, Diverse celebrated its 25th anniversary in 2018 as a franchised electronic component distributor and production equipment and consumables supplier. Fully ISO 9001:2015-certified, Diverse Electronics distributes products from an extensive range of more than 100 world-class manufacturers, resulting in the largest inventory of electronic component and production supply products in Canada. The company also offers flexible material management programs to help its customers address the industry’s rising material acquisition costs.
