

Diverse Electronics Now Authorized for On-Shore Tech

Diverse Electronics is pleased to announce it is now an authorized distributor of **On-Shore Technology (OST)**. On-Shore is a leading provider of terminal blocks, sockets, headers, USBs and other interconnect products. The company's products are fit-form-function and quality-equivalent with other manufacturers such as Molex, Samtec, Tyco(TE), and Phoenix Contact, and are manufactured to be drop in replacements with the majority of competitor products.

"Diverse is very pleased to add On-Shore to our strong interconnect lineup," said Rick Masciotra, President of Diverse Electronics. "Known for its extensive product offering and quality, On-Shore fits well with our customers' varied requirements. Coupled with safety approvals, competitive pricing and local support, we can meet nearly every connector demand."

About On-Shore Technology

On-Shore Technology, Inc. (OST), founded in 1988 and headquartered in Tempe, Arizona, is a leading international supplier of terminal blocks, sockets, USB, headers and other interconnect products for the computer, control, telecom and other electronic industries. With thousands of skus in its product lineup, OST is able to meet the needs of some of the world's largest companies.

About Diverse Electronics

Founded in 1993, Diverse Electronics is an authorized stocking distributor of electronic components, production tools and equipment, and industrial components. ISO 9001:2015-certified, Diverse Electronics distributes products from an extensive range of more than 100 world-class manufacturers, resulting in the largest available inventory in Canada. The company also offers flexible material management programs to help customers address the industry's rising material acquisition costs.
