

Vision Engineering announces 360° Rotation Viewer for the EVO Cam Digital Microscope

The simplest way to inspect all the way around a component without holding it!

Following the recent launch of its incredible 1080p HD EVO cam, Vision Engineering has just launched a new 360° rotation viewer accessory. This ultimate inspection accessory enables a full 360° rotating view around the subject and provides enhanced observation for many applications, including electronics (PCB solder joints, holes, pillars and thread forms), mechanical, medical and plastics components. Easily switch between 360° rotating view and a conventional direct view for ultimate convenience. Includes integrated 8-point LED ringlight and objective lens.

Features and Benefits:

- Unprecedented 360° rotating views
- Gives the user better understanding of the 3D nature of a subject using 2D digital technology
- Exceptional ease of use
- Seamlessly switch between 360° rotating views to a conventional direct top view
- High quality stand options, built for precision and stability
- Ideal for industrial and life science applications

Ideal for:

- Precision magnification tasks
- Quality control
- Electronics inspection
- Entomology
- Forensics
- Dental rework
- Hair restoration
- Arts and antiquities assessment
- Micro assembly
- Micro mechanics
- Presentation and training

Request a demo for the EVO Cam and EVR065, the 360° degree rotational viewer, contact Diverse Electronics at 1-800-388-7308 or sales@diverseelectronics.com.

About EVO Cam

An advanced full-HD digital microscope with stunning full-HD 1080p / 60fps live video image quality, simplifying magnification tasks to allow you to focus on the detail. Effortlessly capture full-HD images direct to USB memory stick.

- Stunning full-HD 1080p / 60fps live video
- Large 30:1 optical zoom with magnification up to 300x
- Stand-alone simplicity, with image capture direct to USB memory stick (without a PC)
