GRAB-EEZ®

Cleanroom Wipe Dispenser

A solution to wipe waste and cross-contamination in the cleanroom.

The GRAB-EEZ® Cleanroom Wipe Dispenser, *now made from durable stainless steel*, is your cost saving solution to wasteful wipe use. The easy to use GRAB-EEZ® is wall or table top mountable and is designed to eliminate wasteful wipe use, cross contamination, and counter top clutter.

Why stainless steel?

Durability & Longevity: Stainless steel withstands a variety of cleaning solvents without degrading or breaking down. Withstands heavy wear and tear - stands the test of time.

Corrosion Resistance: Stainless steel has excellent corrosion resistance properties that make it resistant to rust, staining, and contamination. This helps to maintain the cleanliness of the environment and avoid contamination of sensitive products.

Cleanliness: Easier to clean and disinfect, stainless steel is smooth and non-porous, making it easier to maintain a superior level of cleanliness.

Environmentally Friendly: Stainless steel is a sustainable and eco-friendly material as it is 100% recyclable and can be reused without compromising its properties.

Features & Benefits

- New: Stainless steel construction
- 9" x 9" C-folded wipes
- Redesigned cover makes loading wipes easier!
- Optional plastic shield protects wipes inside!
- Eliminates waste – No more loss of wipes!
- Approximately 3X less unnecessary usage = 3X less expensive!
- No cross-contamination
- User friendly
- Easier to use with gloved hands
- Conforms to good housekeeping practices
- Counter top or wall mountable
- Protected from environment
- Unique double c-folded design
- Extremely low in particles & low in chemical extractables
- Up to ISO Class 5 (Class 100) cleanroom compatibility

Packaging

GlobalTech® Chemicals

Chemicals and cleaners for industrial, electronic assembly manufacturing and precision cleaning applications

- Unique formulas designed for cleaning a variety of surfaces, devices, products, and equipment
- Packaging option: Drums, gallons, and spray bottles
- Also available: GlobalTech® SuperSaturated® SmartWipes® Presaturated wipes and foil refill packs
- Environmentally responsible solvents

Our GlobalTech® Chemical Division delivers a complete line of innovative and unique formulations for use in electronic assembly manufacturing and precision cleaning applications. These environmentally responsible solvents provide safer, better-performing, higher-quality and more eco-sustainable products, packaged in convenient delivery systems for optimum value and utility.

As the complexity of the SMT PCB assembly continues to advance and the evolution of sensitive high-tech devices demand products that optimize performance, use our application specific chemistries to improve your cleaning efficiency and process. Ideal in a variety of cleaning methods such as; ultrasonic machines and batch defluxing systems, stencil and misprint cleaners or manual applications.

Every step of the manufacturing, filling and shipping is handled under strict manufacturing controls, enabling us to offer products of the highest reliability to meet today's performance, compatibility, and environmental requirements. We supply these products in a range of concentrations and in several packaging options including; drums, gallons, sprays, saturated wipes and foil refill packs.

Tacky Traxx®

- Tacky Traxx Mats® are designed to remove particulate from foot and cart traffic upon entering a cleanroom.
- Each clean film adhesive mat features numbered corner tabs for easy tracking of remaining sheets.
- Durable and smooth surface stands up against heavy foot traffic and cart wheels.
- Peel-off sheets eliminate the need for messy cleaning & make it easy to maintain a clean surface.
- Ideal for cleanrooms, laboratories, industrial settings, and other environments that need to control dirt, dust and contamination.

Stencil Wiping Rolls

Understencil Wiping Rolls are a critical part of the SMT PCB assembly process. Using high quality rolls can reduce or prevent defect-causing smearing, bridging, and solder balls produced by normal printing of solder paste onto PC Boards. This is why we utilize only the best materials to manufacture our understencil wiping rolls. Our two most popular options are Green Monster® and SmartRolls®. Both lines exceed the demanding requirements of the equipment manufacturer and combine to offer the widest range of OEM compatible rolls on the market.

Smart Rolls® Understencil Wiping Rolls

SmartRolls® Understencil Wiping Rolls are made from a blend of Wood Pulp and Polyester with no chemical binders. The hydro-entanglement process yields exceptional strength, absorbency and a virtually lint-free finished product – resulting in increased stencil cleaning efficiency. SmartRolls effectively remove residual adhesives, solder pastes and fluxes, with or without solvents, and have excellent airflow characteristics that are perfect for vacuum assisted wiper systems.

The specific grade of material we use is different from other manufacturers in the industry, resulting in better all-around performance. Using our high-quality wiping rolls will help prevent many common production defects like bridging, smearing, solder balls, and other problems associated with circuit board printing/assembly.

- Extremely low lint
- Works both dry and wet
- Works with or without vacuum
- Custom and standard sizes available
- Individually wrapped in ESD Safe, static dissipative shrink film
- Absorbs solder paste & flux residue into the fabric
- No chemical binders
- Industry standard

Compatibility

Available in a wide range of sizes to fit popular SMT screen printer models including:

- **DEK**
- **EKRA**
- **Speedline/MPM**
- **JUKI**
- **Panasonic**
- **Samsung**
- **SJ Innotech**
- **SpeedPrint**
- **Yamaha**
- **Rolls for legacy brands such as SMTech available**
- **Custom options available**

Green Monster® Understencil Wiping Rolls

Green Monster® Understencil Wiping Rolls offer unmatched performance. Whether they are being used wet, with a solvent bar system, or dry with a vacuum assisted wiper system, it is completely ESD safe. This unique material is constructed from a blend of coarse Rayon and ESD polyester that is bonded together by proprietary formula of copolymers.

This construction method prevents lint fibers coming off the surface of the roll and getting into solder joints, while allowing solder paste and flux residue to be absorbed and trapped within the fabric.

- Exclusive – only available from High-Tech Conversions
- Completely ESD Safe
- Non Linting
- Best performance
- Works both dry and wet
- Works with or without vacuum
- Traps solder and flux residue between the fibers
- Very strong, will not tear or shred

Squeegee Blades & Holders

Cutting-edge squeegee blades and holders for PCB / SMT stencil printers

Our comprehensive line of OEM compatible holders and blades was developed using decades of research and technical manufacturing experience. Years of expert craftsmanship ensures superior quality in both standard and custom squeegees options.

Our Proprietary Plating

Hardness · Adhesion · Lubricity · Conductivity · Precision

The Electroplating® process uniformly bonds a smooth, very dense, pure chromium, non-magnetic, extremely hard (Rc 70/72) proprietary alloy onto our stainless steel base premium metal blades. This alloy provides an unusual combination of bearing properties, remarkable wear resistance, extremely low coefficient of friction and corrosion protection. The smooth sliding properties enhances paste rolling and release as well as aids in cleaning. The plating surface is satin gray in color, continuous, fine grained, adherent, uniform in thickness and appearance and is free of blisters, pits, nodules, porosity and edge build-up. Electroplating continues to be the leading plating in the electronics industry!

Polyurethane blades

JNJ's ProEdge brand of high performance polyurethane squeegee blades have a reputation for providing exceptional print deposition and superior quality. Made from the highest grade polyurethane materials, our blades are solvent and abrasion resistant, withstand cracking under repetitive flexing, offer high level impact resistance and have an inherent elastic memory. Unlike molded blades, our precision machined edges are always sharp, resulting in highly accurate printing.

Lead-Free Options

With today's strict regulations in the production of lead-free electronics, our green anodized squeegee holders and labeled metal blades enable easy identification of printing accessories designated for RoHS-compliant applications. JNJ's Electroplating plated metal blades offer improved compatibility with lead-free pastes, aid in paste release and reduce surface tension to extend the printing life of the blades, as well as the pastes. Our lead-free plating and label option is available for all standard OEM and custom holders and blades.

Contract Manufacturing & Converting Capabilities

Custom Options Including:

Converting capabilities for a variety of materials including nonwovens, knits, wovens, paper and more

- Saturating nonwovens with a variety of solvents, including various blends of isopropyl alcohol
- Slitting – Rewinding
- Die-Cutting
- Packaging
- Heat Sealing
- Sewing

Private Label & Drop Shipping

Private Label Wipe Options:

Dry & Presaturated

- Custom saturation levels with a variety of solvents
- Custom Packaging and Label Design
- Poly/Cellulose, Polyester, Polypropylene, Cotton, + More
- Cleanroom Compatibility: ISO 3-4 (Class 1-10), ISO 5-ISO 6 (Class 100-1000), ISO 7+ (Class 10,000+)
- Custom Sizes
- Cleanroom Processed
- Validated Sterile
