Wide Capacity Adjustable Wrenches

Impressive new design, same reliable Crescent[®] quality.

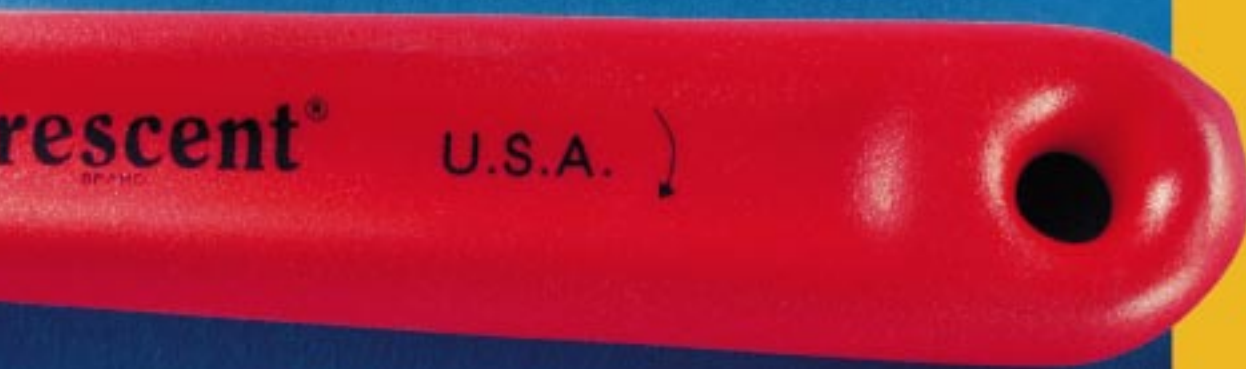

- Everywhere you look there is something new -

When we decided to improve our adjustable wrench, we wanted to raise the standard of excellence for the industry, and we did just that. Our new design starts with an increased jaw capacity - up to 25% larger than conventional adjustable wrenches. Now a smaller wrench can work on larger and more varied projects, no competitive wrench offers more capacity than Crescent.

Based on extensive Ergonomic Research, our new Crescent® Adjustable Wrench is designed for the highest functionality and user comfort. For maximum comfort we have increased the handle width up to 71%, which reduces the pressure on the hand. The result of these changes is a greater working capacity and improved

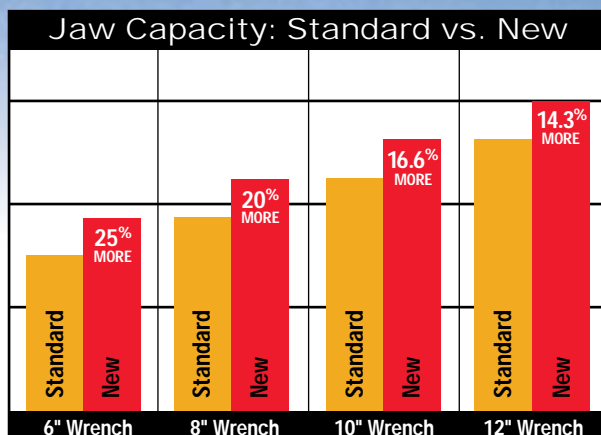

The wider handle reduces hand fatigue and makes the wrench more comfortable to use.

user comfort. The Crescent® Wide Capacity Adjustable Wrench - world famous quality, plus features you can't find anywhere else. Impressive!

Extra wide capacity jaw opens up to 25% wider than standard adjustable wrenches.

Our hex jaw design allows for a more secure fit on your task. While providing added safety by reducing slippage.
