

NEW LINE

UPGRADE TO THE BEST SOLDER SYSTEMS ON THE MARKET

- *LESS COMPONENT DAMAGE*
- *INCREASED PRODUCTIVITY*
- *LONGEST TIP LIFESPAN*

INVESTING IN QUALITY SYSTEMS IMPROVES PERFORMANCE,
INCREASES PRODUCTIVITY AND SAVES MONEY OVER TIME

JBC HIGH-TECHNOLOGY STATIONS FEATURE:

- Exclusive heating system reaches 350° in 2 seconds and recovers tip temperature quickly – *user efficiency is increased and working at lower temperatures reduces the risk of component damage*
- Sleep and hibernation mode immediately drop tip temperature – *tip life lasts 5x longer reducing overall costs*
- Uniquely designed quick cartridge extractor allows for faster, safer cartridge changing – *saving time and increasing productivity*

COMPACT SERIES GENERAL PURPOSE SOLDERING STATION 120V CD-1BE

- For general purpose electronic applications
- Specialized heating system, hibernation mode and 20 customizable parameters
- Works with T245 hand piece & C245 cartridges
- Can also connect with T210 & C210 units

NANO REWORK STATION 120V NASE-1C

- Ideal for repairing 0402, 0201 & 01005
- Offers complete temperature control
- Includes NP115 Adjustable Nano Tweezers, NT115-A Nano Handpiece & 8 cartridges

COMPACT SERIES MICRO TWEEZER REWORK STATION 120V CP-1E

- For soldering and desoldering
- Ideal for small & medium SMD components
- Includes PA120-A micro tweezers
- Uses C120 cartridges (C120002 included)

CD-1BE, NASE-1C AND CP-1E are CSA approved. For information on tips, cartridges and other accessories, and to shop online, visit <https://www.diverseelectronics.com/JBC-Soldering-Tools-b1214/>
