

NEW PRODUCT SIZE

8342

RA Rosin Flux Paste

8342 is a premium RA rosin flux paste with moderate activation and a stiff paste-like consistency. It is easy to use and stays where it is applied.

This RA rosin flux paste is ideal for hand soldering and can be applied by brush, cotton swab, or dipping. It is excellent for the assembly, rework and repair of PCBs and surface mount assemblies, and for general electronics repairs.

Rosin flux paste for electronics

For both leaded and lead-free solders

High tack force and long tack time

Excellent wetting during soldering

Free of zinc chloride and ammonium chloride

RoHS Compliant

New Syringe

10 mL, 9.5 g

Applications

Assembly, rework and repair of PCBs and surface mount assemblies

Applications with both leaded and lead-free soldering

General electronics repair

Through-hole and surface mount

Solder touch-ups

Available Packaging

8342-10ML Syringe 10 mL, 9.5 g

8342-50G Jar 37.7 mL, 50 g
